Office Home & Business Email Bind for Apple Mac

1. Uninstall any existing MS Office package, then restart your Mac.
2. Visit https://setup.office.com/
3. Log in with your MS email account or create a new ID if you don't have one (e.g., abc@outlook.com, abc@hotmail.com).
4. Enter your product license key to redeem on this account.
5. Download the Office setup from "purchase & subscription".
6. Install the downloaded Office software.
7. Open any app such as Word or Excel.
8. Log in with the same email ID through which you downloaded the setup file.
9. Done! It's activated!

Caution: If you have an Office 365 subscription linked to this ID you are using, consider using a different ID. Using the same ID may force the installation of Office 365 instead of your purchased version.
